

TAP AERATORS

REDUCING TAP WATER FLOW BY UPTO 80%

Presented By

BANGALORE APARTMENTS' FEDERATION (BAF)

19th August, 2017

Disclaimer: Bangalore Apartments' Federation (BAF) has negotiated with 2 aerator vendors for exclusive offers for BAF Members. However, Members are free to negotiate with other vendors, apart from the vendors mentioned in this note who have offered exclusive discounts to BAF Members. BAF advises its members to exercise diligence before taking any decision. BAF will not assume any liability for any implications of decisions taken by anybody, based on this document.

BACKGROUND & PROBLEM

Every passing year, Bengaluru is facing a crisis of increasing proportion on water, be it the ground water level, Cauvery water availability or the ability to retain rain water.

BAF believes that apartment residents & management committees of apartments need to do their bit to help conserve this precious resource which is becoming increasingly scarce. A simple way for apartments to contribute is by helping reduce consumption. This not only makes civic sense, but it also makes commercial sense for apartments, with water costs expected to continue to spiral upwards in the future.

TYPICAL WATER CONSUMPTION IN A HOUSEHOLD

Various estimates peg the benchmark consumption of fresh water at about 135 litres per adult per day. Based on this, a normal household comprising 4 people, including children, will consume about 500 litres per day. However, through some simple measures, the water consumption per capita can be brought down to less than 100 litres per person per day.

TAP AERATORS HELP SAVE WATER UP TO 80%

Aerators are small devices that can be fitted on to the end of taps or inserted inside existing spouts, to control / regulate the flow of water. These water saving devices control the amount of water that flows through the tap without affecting the water pressure. Aerators are easy to fix and are available in various sizes which ensures that they can be retrofitted with all existing taps.

EXCLUSIVE DISCOUNTS FOR BAF MEMBERS FROM TWO AERATOR VENDORS

BAF has tied up with the following 2 vendors for exclusive offers for BAF Members, details of which are outlined subsequently –

- **NEO SYSTEK** selling **ECO365** brand of Aerators
- **AKRUTHI ENVIRO** selling **NEO PERL** brand of Aerators

Both vendors are offering an exclusive 12% discount to BAF Members. Each apartment can negotiate with both the vendors to arrive at the best offer, depending on the size & type of the order (without even disclosing that one is a BAF Member). Once the final offer is negotiated with any of these two vendors, if the BAF Membership number is quoted, you will be entitled to the additional exclusive 12% discount available for BAF Members.

ANNEXURE – I
(DETAILS OF THE VENDORS)
